About Stainalloy

Over several decades Stainalloy has grown to be an established stockist and project managing organisation within the oil & gas-producing and -processing industry, power generation and desalination.

The high level of service handles the full procurement cycle according to your client specifications. The dedicated and skillful project teams at Stainalloy, operating in the disciplines of sales, expediting and quality management, will assist through the various project stages. This includes quality control of materials, monitoring and guidance of suppliers, arrangement of documentation, and if necessary, total package delivery to the end customer.

Furthermore, as specialised distributor we offer a unique and extensive product range from stock, which includes packages of high-alloyed steel pipes and related components comprised of fittings, flanges, forgings and plates. [Read more >>](#)

Materials

Quality Labels

ISO 9001:2015

Health Safety Environment

Certificate of re-marking

Available in seamless and welded pipes, flanges, fittings, plates and engineered products starting from NPS ½" up to 48". [Read more >>](#)

■ Duplex
UNS S31803/S32205

■ Nickel Alloy 800
UNS N08800/N08810/N08811

■ Super Duplex
UNS S32750/S32760

■ Austenitic Stainless Steel
A/SA312 TP304H/TP316L/TP317/
TP321/TP321H/TP347/TP347H

■ Nickel Alloy 625
UNS N06625

■ Low Alloy steels
A/SA335 P11/P22/P5/P9/P91/P92

■ Nickel Alloy 825
UNS N08825

■ High Yield Carbon Steel
API 5L X grade 65
